

**Zero Pellet,
Powder and
Flake Loss**

**Show your commitment
to the environment and
sign the pledge**

OPERATION CLEAN SWEEP® (OCS) is an international program designed to prevent resin pellet loss and help keep pellets out of the marine environment. Every segment of the plastics industry has a role to play by implementing good housekeeping and containment procedures. This includes resin producers, transporters, bulk terminal operators, plastics processors and recyclers.

**Pledging
will help
strengthen
your
company's:**

- Contribution to preserving water quality and wildlife
- Employee health and safety program
- Operational efficiency
- Reputation in the community
