Recycling the 'Unrecyclable'

A BPF Seminar

Presentations by

Recycling the 'Unrecyclable'

A new seminar for 2015, Recycling the 'Unrecyclable' aims to provide delegates with an exploration of new and exciting technologies and techniques that will add previously unrecyclable products to the circular economy and help you meet the EU recycling targets. This is your opportunity to discover the cutting edge recycling technologies that you may be able to use in your business to increase the amount of material you recycle and to increase profits.

Aimed at senior and middle managers from all parts of the plastics recycling supply chain this is your chance to network with your peers, share ideas and to make sure that you and your staff are briefed on the very latest recycling ideas.

Seminar Programme

10:00 Registration and Refreshment

10:30 Chairmans Introduction, *Roger Baynham, Philip Tyler Polymers*

The Current Situation

10:45 Where are we now and where are we going? *Professor Helmut Maurer, DG Environment*

11:15 Where are the hidden tonnes? A reality check on plastics recycling
Keith Freegard, Axion Recycling

11:40 Morning Break

Innovating with Waste

11:55 Marine litter in packaging applications, *Tom Domen, Ecover*

12:20 An innovative way to separate PE from PP, *Steve Burns, Impact Solutions*

12:50 Compatibilisers for use in mixed plastic sources, *Xavier Bories-Azeau, Dupont*

13.10 Networking Lunch

Collaboration in the Supply Chain

14:00 Recomed project, *Hannah Burke, Axion Recycling*

14:25 Specific collection methods for non-recycled packaging
Andy Pritchard, Gloucestershire Joint Waste Team

What to do when Recycling may not be the Answer

14:45 Fuel from plastics waste, *Adrian Griffiths, Recycling Technologies*

15:15 Energy from waste, *Mark Terrell, SUEZ Environnement*

15:40 Afternoon Break and Close

Speakers Biographies

Steve Burns, Impact Solutions

Steven is Commercial Director of Impact Recycling, and Development Manager with Impact Solutions, an innovative plastics company specialising in R&D, product approval and physical testing.

He has project managed the research, development and scale up of an innovative new technology for separating mixed plastics which is currently undergoing pre commercialisation trials.

Steven has a range of worldwide commercial experience having run companies throughout the Far East, where he helped return used electronic devices to the market-place.

Keith Freegard, Axion Recycling

Keith is a Director of Axion Recycling Ltd, with over 25 years of operational management experience in a wide range of production environments. As a Chartered Chemical Engineer, Keith believes in applying the best processing technology to extract maximum yield and value from plastic waste streams. In recent years he has been developing Axion's unique plastics recycling business in Manchester with a focus on sales and marketing of high-quality polymers made from recovered WEEE plastic waste.

Andy Pritchard, Gloucestershire Joint Waste Team

Andy Pritchard is the Waste Projects Manager for the Gloucestershire Joint Waste Team, a partnership comprising a number of waste collection and disposal authorities. He has worked in a number of roles developing waste strategy and implementing new services over several years. Prior to that Andy was an Engineer and Environmental Auditor working to improve environmental performance at various companies in the electronics engineering and manufacturing sector.

Mark Terrell, SUEZ environnement

Mark joined SUEZ environnement, Recycling and waste recovery UK, formerly known as SITA UK in 2010 to develop the alternatives fuels business concentrating on wood fuel and more recently on solid recovered fuel (SRF) and refuse derived fuel (RDF).

Mark Terrell is responsible for development of new end markets for the alternatives fuels such as solid recovered fuel and refuse derived fuel for SUEZ environnement, Recycling and waste recovery UK.
